

# SAFETY DATA SHEET

Revision date 16-Oct-2024

Version 3

## Section 1: Identification

### Product identifier

**Product name** SNAP-Capture Pull-Down Resin

**Product No** S9144

### Other means of identification

**Synonyms** None

### Recommended use of the chemical and restrictions on use

**Recommended use** This product is for research and development only

**Uses advised against** No information available

### Details of the supplier of the safety data sheet

#### Supplier

New England BioLabs (Australia) Pty Ltd  
22/270 Ferntree Gully Road  
Notting Hill, VIC 3168

**E-mail address** info.au@neb.com

### Emergency telephone number

**Company Phone Number** 0800 437 209

**National Poisons Centre** 0800 764 766 (toll free)

**24 Hour Emergency Phone Number** Chemtrec +65 3163 8374

**Section 2: Hazard identification****GHS Classification**

|                                                  |            |
|--------------------------------------------------|------------|
| Serious eye damage/eye irritation                | Category 2 |
| Specific target organ toxicity (single exposure) | Category 3 |

**Label elements****Signal word**

Warning

**Hazard statements**

Causes serious eye irritation

May cause drowsiness or dizziness

**Precautionary Statements - Prevention**

Wash face, hands and any exposed skin thoroughly after handling

Wear eye/face protection

Avoid breathing dust/fume/gas/mist/vapors/spray

Use only outdoors or in a well-ventilated area

**Precautionary Statements - Response****Eyes**

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing

If eye irritation persists: Get medical advice/attention

**Inhalation**

IF INHALED: Remove person to fresh air and keep comfortable for breathing

Call a POISON CENTER or doctor if you feel unwell

**Precautionary Statements - Storage**

Store in a well-ventilated place. Keep container tightly closed

Store locked up

**Precautionary Statements - Disposal**

Dispose of contents/container to an approved waste disposal plant

**Other hazards which do not result in classification**

May be harmful if swallowed.

**Section 3: Composition/information on ingredients**

| Chemical name     | CAS No. | Weight-% |
|-------------------|---------|----------|
| Isopropyl Alcohol | 67-63-0 | 50 - 60% |

|                           |             |         |
|---------------------------|-------------|---------|
| Non-hazardous ingredients | Proprietary | Balance |
|---------------------------|-------------|---------|

\*The exact percentage (concentration) of composition has been withheld as a trade secret.

## Section 4: First-aid measures

### Description of first aid measures

|                                    |                                                                                                                                                                                                                                                                                     |
|------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| General advice                     | Show this safety data sheet to the doctor in attendance.                                                                                                                                                                                                                            |
| Inhalation                         | Remove to fresh air. IF exposed or concerned: Get medical advice/attention.                                                                                                                                                                                                         |
| Eye contact                        | Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Keep eye wide open while rinsing. Do not rub affected area. Get medical attention if irritation develops and persists. |
| Skin contact                       | Wash skin with soap and water.                                                                                                                                                                                                                                                      |
| Ingestion                          | Do NOT induce vomiting. Rinse mouth. Never give anything by mouth to an unconscious person. Call a physician.                                                                                                                                                                       |
| Self-protection of the first aider | Avoid contact with skin, eyes or clothing. Wear personal protective clothing (see section 8).                                                                                                                                                                                       |

### Most important symptoms and effects, both acute and delayed

|          |                                                                                                                                                                                    |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Symptoms | May cause redness and tearing of the eyes. Burning sensation. Inhalation of high vapor concentrations may cause symptoms like headache, dizziness, tiredness, nausea and vomiting. |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### Indication of any immediate medical attention and special treatment needed

|                    |                        |
|--------------------|------------------------|
| Note to physicians | Treat symptomatically. |
|--------------------|------------------------|

## Section 5: Fire-fighting measures

### Suitable extinguishing media

|                              |                                                                                                         |
|------------------------------|---------------------------------------------------------------------------------------------------------|
| Suitable Extinguishing Media | Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. |
| Large Fire                   | CAUTION: Use of water spray when fighting fire may be inefficient.                                      |

|                                |                                                                   |
|--------------------------------|-------------------------------------------------------------------|
| Unsuitable extinguishing media | Do not scatter spilled material with high pressure water streams. |
|--------------------------------|-------------------------------------------------------------------|

### Special exposure hazards in a fire

|                                            |                           |
|--------------------------------------------|---------------------------|
| Specific hazards arising from the chemical | No information available. |
|--------------------------------------------|---------------------------|

### Protective equipment and precautions for firefighters

|                                                                |                                                                                                 |
|----------------------------------------------------------------|-------------------------------------------------------------------------------------------------|
| Special protective equipment and precautions for fire-fighters | Firefighters should wear self-contained breathing apparatus and full firefighting turnout gear. |
|----------------------------------------------------------------|-------------------------------------------------------------------------------------------------|

## Section 6: Accidental release measures

### Personal precautions, protective equipment and emergency procedures

|                      |                                                                                                                                                          |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Personal precautions | Ensure adequate ventilation. Use personal protective equipment as required. Evacuate personnel to safe areas. Avoid contact with skin, eyes or clothing. |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|

**Other information** Refer to protective measures listed in Sections 7 and 8.

**For emergency responders** Use personal protection recommended in Section 8.

#### **Environmental precautions**

**Environmental precautions** See Section 12 for additional Ecological Information.

#### **Methods and material for containment and cleaning up**

**Methods for containment** Prevent further leakage or spillage if safe to do so.

**Methods for cleaning up** Pick up and transfer to properly labeled containers.

#### **Precautions to prevent secondary hazards**

**Prevention of secondary hazards** Clean contaminated objects and areas thoroughly observing environmental regulations.

### **Section 7: Handling and storage**

#### **Precautions for safe handling**

**Advice on safe handling** Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin, eyes or clothing. Do not eat, drink or smoke when using this product. Ensure adequate ventilation. Avoid breathing vapors or mists. In case of insufficient ventilation, wear suitable respiratory equipment.

**General hygiene considerations** Avoid contact with skin, eyes or clothing. Wear suitable gloves and eye/face protection. Do not eat, drink or smoke when using this product.

#### **Conditions for safe storage, including any incompatibilities**

**Storage Conditions** Keep containers tightly closed in a dry, cool and well-ventilated place.

**Incompatible materials** None known based on information supplied.

### **Section 8: Exposure controls/personal protection**

#### **Control parameters**

##### **Exposure Limits**

| Chemical name                | New Zealand                                                                                 | Australia                                                                                   | ACGIH TLV                     | United Kingdom                                                                              |
|------------------------------|---------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|-------------------------------|---------------------------------------------------------------------------------------------|
| Isopropyl Alcohol<br>67-63-0 | TWA: 400 ppm<br>TWA: 983 mg/m <sup>3</sup><br>STEL: 500 ppm<br>STEL: 1230 mg/m <sup>3</sup> | TWA: 400 ppm<br>TWA: 983 mg/m <sup>3</sup><br>STEL: 500 ppm<br>STEL: 1230 mg/m <sup>3</sup> | TWA: 200 ppm<br>STEL: 400 ppm | TWA: 400 ppm<br>TWA: 999 mg/m <sup>3</sup><br>STEL: 500 ppm<br>STEL: 1250 mg/m <sup>3</sup> |

##### **Biological occupational exposure limits**

| Chemical name                | New Zealand | ACGIH                                                       |
|------------------------------|-------------|-------------------------------------------------------------|
| Isopropyl Alcohol<br>67-63-0 | -           | 40 mg/L - urine (Acetone) - end of shift at end of workweek |

#### **Appropriate engineering controls**

Engineering controls                      Showers  
                                                  Eyewash stations  
                                                  Ventilation systems.

**Individual protection measures, such as personal protective equipment**

Eye/face protection                      If splashes are likely to occur, wear safety glasses with side-shields.

Hand protection                              Wear suitable gloves.

Skin and body protection                      Wear suitable protective clothing.

Respiratory protection                      No protective equipment is needed under normal use conditions. If exposure limits are exceeded or irritation is experienced, ventilation and evacuation may be required.

Environmental exposure controls              No information available.

**Section 9: Physical and chemical properties**

**Information on basic physical and chemical properties**

Physical state                              Liquid  
 Appearance                                Colorless  
 Color                                        No information available  
 Odor                                        Mild.  
 Odor threshold                              No information available

| <b><u>Property</u></b>                  | <b><u>Values</u></b>      | <b><u>Remarks • Method</u></b> |
|-----------------------------------------|---------------------------|--------------------------------|
| pH                                      | No data available         | None known                     |
| Melting point / freezing point          | No data available         | None known                     |
| Initial boiling point and boiling range | No data available         | None known                     |
| Flash point                             | 18 °C                     |                                |
| Evaporation rate                        | No data available         | None known                     |
| Flammability (solid, gas)               | No data available         | None known                     |
| Flammability Limit in Air               |                           | None known                     |
| Upper flammability or explosive limits  | No data available         |                                |
| Lower flammability or explosive limits  | No data available         |                                |
| Vapor pressure                          | No data available         | None known                     |
| Vapor density                           | No data available         | None known                     |
| Relative density                        | No data available         | None known                     |
| Water solubility                        | No data available         | None known                     |
| Solubility(ies)                         | No data available         | None known                     |
| Partition coefficient                   | No data available         | None known                     |
| Autoignition temperature                | 399 °C                    |                                |
| Decomposition temperature               |                           | None known                     |
| Kinematic viscosity                     | No data available         | None known                     |
| Dynamic viscosity                       | No data available         | None known                     |
| Explosive properties                    | No information available. |                                |
| Oxidizing properties                    | No information available. |                                |

**Other information**

Softening point                              No information available  
 Molecular weight                              No information available  
 VOC content                                No information available  
 Liquid Density                                No information available  
 Bulk density                                No information available  
 Particle characteristics                        No information available

## Section 10: Stability and reactivity

### Reactivity

**Reactivity** No information available.

### Chemical stability

**Stability** Stable under normal conditions.

### Explosion data

**Sensitivity to mechanical impact** None.

**Sensitivity to static discharge** None.

### Possibility of hazardous reactions

**Possibility of hazardous reactions** None under normal processing.

### Conditions to avoid

**Conditions to avoid** None known based on information supplied.

### Incompatible materials

**Incompatible materials** None known based on information supplied.

### Hazardous decomposition products

**Hazardous decomposition products** None known based on information supplied.

## Section 11: Toxicological information

### Acute toxicity

### Information on likely routes of exposure

#### Product Information

|                     |                                                                                                                                                                 |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Inhalation</b>   | Specific test data for the substance or mixture is not available. May cause irritation of respiratory tract. May cause drowsiness or dizziness.                 |
| <b>Eye contact</b>  | Specific test data for the substance or mixture is not available. Causes serious eye irritation. (based on components). May cause redness, itching, and pain.   |
| <b>Skin contact</b> | Specific test data for the substance or mixture is not available. May cause irritation. Prolonged contact may cause redness and irritation.                     |
| <b>Ingestion</b>    | Specific test data for the substance or mixture is not available. Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.               |
| <b>Symptoms</b>     | May cause redness and tearing of the eyes. Inhalation of high vapor concentrations may cause symptoms like headache, dizziness, tiredness, nausea and vomiting. |

### Acute toxicity

#### Numerical measures of toxicity

The following values are calculated based on chapter 3.1 of the GHS document  
**ATEmix (oral)** 3,740.00 mg/kg

|                               |                |
|-------------------------------|----------------|
| ATEmix (dermal)               | 8,118.00 mg/kg |
| ATEmix (inhalation-gas)       | 99,999.00 ppm  |
| ATEmix (inhalation-vapor)     | 60.20 mg/l     |
| ATEmix (inhalation-dust/mist) | 99,999.00 mg/l |

**Component Information**

| Chemical name     | Oral LD50            | Dermal LD50             | Inhalation LC50         |
|-------------------|----------------------|-------------------------|-------------------------|
| Isopropyl Alcohol | = 1870 mg/kg ( Rat ) | = 4059 mg/kg ( Rabbit ) | > 10000 ppm ( Rat ) 6 h |

**Delayed and immediate effects as well as chronic effects from short and long-term exposure**

|                                          |                                                                                        |
|------------------------------------------|----------------------------------------------------------------------------------------|
| <b>Skin corrosion/irritation</b>         | No information available.                                                              |
| <b>Serious eye damage/eye irritation</b> | Classification based on data available for ingredients. Causes serious eye irritation. |
| <b>Respiratory or skin sensitization</b> | No information available.                                                              |
| <b>Germ cell mutagenicity</b>            | No information available.                                                              |

**Carcinogenicity**

The table below indicates whether each agency has listed any ingredient as a carcinogen.

| Chemical name               | New Zealand | IARC    |
|-----------------------------|-------------|---------|

|  | Desmodesmus subspicatus)<br>EC50: >1000mg/L (72h,<br>Desmodesmus subspicatus) | Pimephales promelas)<br>LC50: =11130mg/L (96h,<br>Pimephales promelas)<br>LC50: >1400000µg/L (96h,<br>Lepomis macrochirus) | Daphnia magna) |
|--|-------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|----------------|

**Terrestrial ecotoxicity** There is no data for this product.

**Persistence and degradability** No information available.

### Bioaccumulative potential

#### Bioaccumulation

##### Component Information

| Chemical name     | Partition coefficient |
|-------------------|-----------------------|
| Isopropyl Alcohol | 0.05                  |

### Mobility in soil

**Mobility** No information available.

### Other adverse effects

No information available.

## Section 13: Disposal considerations

### Waste treatment methods

#### Waste from residues/unused products

Dispose of product in packaging in a way that is consistent with the EPA Consolidation 30 April 2021 of the Hazardous Substances (Disposal) Notice 2017 and the Act. Treat the substance using a method that changes the characteristics or composition of the substance so that the substance is no longer a hazardous substance; or export the substance from New Zealand as waste.

Substances which are hazardous to human health or corrosive to metals – may be discharged into the environment if a tolerable exposure limit has been set for the substance (or a component of that substance); and the discharge does not, after reasonable mixing, result in the concentration of the substance in an environmental medium exceeding the tolerable exposure limit. If there is no tolerable exposure limit for the substance, then it may only be discharged into the environment if the substance is very rapidly converted to substances that are not hazardous substances.

#### Contaminated packaging

For packages that have been in direct contact with hazardous substances, the person must ensure that the package is rendered incapable of containing any substance. It must be disposed of in a manner that is consistent with the requirements for disposal of the substance that it contained, taking into account the material the package is manufactured from.

Packages may only be reused or recycled if:

- the substance has a physical hazard other than corrosive to metal, and has been treated to remove any residual contents of the hazardous substance;
- or for substances that have a health or environmental hazard, or corrosive to metal, the contents of the residue in the package are below the threshold for the substance to be classified as hazardous in the Hazardous Substances (Hazard Classification) Notice 2020.

## Section 14: Transport information

### IATA

|                            |                            |
|----------------------------|----------------------------|
| UN number or ID number     | UN1219                     |
| Proper shipping name       | Isopropyl Alcohol Solution |
| Transport hazard class(es) | 3                          |
| Packing group              | II                         |

### IMDG

#### Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

No information available

#### Special precautions for user

Please refer to the applicable dangerous goods regulations for additional information

## Section 15: Regulatory information

### Regulatory information

#### National regulations

|                                                      |                  |
|------------------------------------------------------|------------------|
| EPA New Zealand HSNO approval code or group standard | To be determined |
|------------------------------------------------------|------------------|

#### National regulations

There are no applicable tolerable exposure limits or environmental exposure limits according to the EPA Controls for Hazardous Substances

#### Certified handlers, tracking and controlled substance license requirements

Certified handlers are required for some substances. This includes substances requiring a controlled substance license, and most explosives, vertebrates toxic agents, and certain fumigants. Acutely toxic substances which are a Category 1 or 2, such as pesticides also require Certified handlers. Please check the Health and Safety at Work Act 2015 for further information

Tracking is required for some highly hazardous substances. These substances need to be under the control of an appropriately trained person or appropriately secured. Please check the Health and Safety at Work Act 2015 for further information

Controlled substance licenses are required to possess certain explosives, vertebrate toxic agents and fumigants. See Part 7 of the Health and Safety at Work Regulation 2017 for more information

### International Regulations

**The Montreal Protocol on Substances that Deplete the Ozone Layer** Not applicable

**The Stockholm Convention on Persistent Organic Pollutants** Not applicable

**The Rotterdam Convention** Not applicable

### International Inventories
