

New England Biolabs Certificate of Analysis

Product Name: SNAP-Capture Pull-Down Resin
Catalog Number: S9144S
Packaging Lot Number: 10152073
Expiration Date: 05/2024
Storage Temperature: 4°C
Specification Version: PS-S9144S v1.0

SNAP-Capture Pull-Down Resin Component List			
NEB Part Number	Component Description	Lot Number	Individual QC Result
S9144SVIAL	SNAP-Capture Pull-Down Resin	10144692	Pass

Assay Name/Specification	Lot # 10152073
Functional Binding Assay (Qualitative) SNAP-Capture Pull-Down Resin (20 µl) were equilibrated and incubated with 200 µl of crude extract from E. coli containing a plasmid that expresses a SNAP-intein-chitin binding domain fusion protein for 1 hour at 25°C, then washed, eluted and evaluated by Tris-Glycine gel to confirm low non-specific binding of extract proteins and high isolation of target.	Pass
Binding Capacity (Magnetic Beads) SNAP-Capture Pull-Down Resin (20 µl) were equilibrated and incubated with 200 µl of crude extract from E. coli containing a plasmid that expresses a SNAP-intein-chitin binding domain fusion protein for 1 hour at 25°C, then washed and the SNAP CBD fusion cleaved and eluted. Binding capacity was determined to be ≥1 mg of target protein per ml of bed volume.	Pass

This product has been tested and shown to be in compliance with all specifications.
